DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 2, 3, and 5 Gilbreth (US 6,487,096) discloses a generator/gas turbine connected to a utility grid by means of an output converter. The generator is capable of performing different system states (table 2 column 13) depending on the inputs of the monitoring systems. Col. 24 lines 37-49 disclose zero crossings to monitor the utility grid. However Gilbreth does not disclose "a voltage phase shift circuit which synchronizes the output voltage phase of said interconnecting inverter with the utility power voltage phase and monitors zero crossings of said utility power voltage, and which, when a predetermined number of zero crossings have been detected, to detect a power outage actively, shifts said output voltage phase from said utility power voltage phase during one cycle and shifts the shifted output voltage phase to said utility power voltage phase during the following cycle". Along with the remaining features of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Amaya whose telephone number is (571) 272-8941. The examiner can normally be reached on M-F 8-4:30.
